# Juice Jacking: Charging Your Phone Could Cost You

Low battery? Don't be too quick to plug in.
That charging station might cost more than you think.

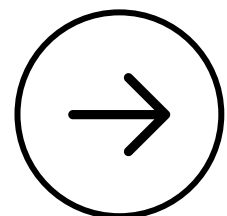

Iwuchukwu Augusta Chioma

What is Juice Jacking?

Juice jacking happens when cybercriminals tamper with USB charging ports or cables to steal data or install malware while your phone appears to be simply charging.They silently:

- Steal files
- Extract saved passwords
- Access financial data
- Install spyware or malware all while your phone charges.
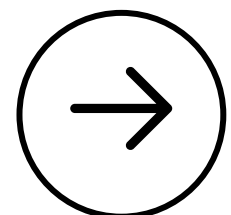

Iwuchukwu Augusta Chioma

Why It's Dangerous

USB cables do more than supply power they also transfer data.
So, plugging into a compromised port is like handing a stranger your unlocked phone for a quick look.
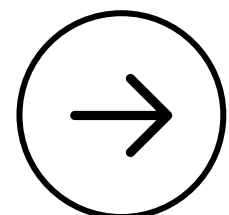

Iwuchukwu Augusta Chioma

How to Protect Yourself

- Use your own charger and wall socket
- Carry a power bank
- Use a USB data blocker ("USB condom")
- Avoid connecting to unknown USB ports
- Keep your phone's software and antivirus updated
